Executive Scorecard

Executive Dashboard Views of Key IT Performance Indicators

Overview

Problem Definition

Executives are becoming increasingly aware of the need to prove the value that IT provides to the organization. Many executives are investing valuable time and resources in seeking IT data to help improve the transparency of their decisions and to convey value by establishing competitive benchmarks.

How can HP Executive Scorecard help?

The HP Executive Scorecard gives executives valuable performance information they need to make better IT decisions and demonstrate continual improvement in IT performance. HP Executive Scorecard automates data collection and analysis from multiple sources, including third-party products, to provide a single, real-time view of IT metrics. It provides dashboards for senior management to show the insights in business-friendly formats. It also allows CIOs to pull together reports that the business can use and appreciate.

The HP Executive Scorecard automates gathering information from diverse sources, consolidating it, linking it to a strategic goals and objectives, and presenting it in near real time.

Key Benefits

Enhanced IT Performance Visibility

HP Executive Scorecard is the first IT balanced scorecard that can automate the process of collating data into the scorecard from underlying data sources. Key Benefits of HP Executive Scorecard include:

- Decision-making and performance KPI's accessed in near real time
- More time for results analysis and less time gathering data
- Consistent agreed-to process for gathering reporting information
- Out-of-the-box integration with HP Software solutions
